

MAINTENANCE AND SUPPLY OF SPARE PARTS

Kewatec AluBoat offers special expertise and assistance in all matters concerning maintenance, modification and procurement of spare parts for your professional boat.

A fully equipped service car and our professional service personnel will, if needed, come to your facility to carry out maintenance and repairs. We offer extensive boat maintenance and repair service for professional boats. We can also store the boat during winter time, perform annual maintenance inspections as well as launch the boat in the spring ready for the new season. If the engine technology has come to an end, we are able to replace the entire driveline. Kewatec plans and implements the desired modernizations, upgrades and refit. If you are in need of spare parts and accessories for professional boats, please contact our service department.

Kewatec boat maintenance is made especially easy with the Kewatec Care program. The maintenance program increases operational reliability and prevents unnecessary downtime. By monitoring the boat's data analysis (operating hours, driving profile, fuel consumption, etc.), we are able to predict the maintenance required for your boat.

MAINTENANCE AND REPAIR

We perform all necessary maintenance and repair work on the boat in a very professional way. Thanks to our fully equipped service car we can either perform the service where the boat is located or, alternatively, at our factory in Kokkola. For service abroad we generally use our service network or our own service team.

DOCKING AND WINTER STORAGE

At our factory in Kokkola, we are able to offer winter storage, including docking, washing, seasonal maintenance, painting and launching.

ENGINE AND DRIVELINE UPGRADES

We perform engine and driveline upgrades for all brands. We dismantle old machines and, if necessary, modify the construction for new equipment. After installation, we will perform all required inspections and test runs to ensure that the updates work.

MODERNIZATION AND REFIT

We carry out all types of modernizations and changes. Kewatec can help you when it comes to hull extensions, modify the function of the deck, rearrange or improve ergonomics in the control cabin. In connection with the modifications, an update of the electronics and the navigation can be made at the same time.

SPARE PARTS AND ACCESSORIES

Our spare part department provides expert assistance for purchasing spare parts for Kewatec boats as well as for boats from other manufacturers.

SERVICE AGREEMENT - Kewatec Care

Kewatec CARES for your boat

For Kewatec boats, we recommend a Kewatec Care agreement, which is tailored to the boat's needs. Used boats can also be connected to the Kewatec Care program. The service facilitates the maintenance of the boat and ensures that the boat receives the recommended maintenance in a timely manner.

Periodic and annual maintenance is documented in advance in the table for maintenance. Based on this, we can follow the boat's operating hours in real time and thus optimize the time for the next service call. During the maintenance, the Kewatec service technician carefully inspects the condition of the boat and indicates what should be serviced. After each service, a maintenance report is made and the visit is recorded in the boat's service book.
